INDEX TO VOLUME XXII

(Asterisked entries are titles.)

Age(s), of couples, and marriage fertility, 281
visual acuity and color vision, 1
*Analysis of heart measurements of growing boys, an, 271
*Application of gene frequency analysis to the interpretation of data from twins, an, 136

Behrens-Fisher problem, 125
Behrens (Reed-Muench) method for LD 50, sampling error of, 151
Bioassay, sampling variation in, 151
Births, frequency by day of week, 218
BLISS, C. I., and YOUNG, M. S., An Analysis of Heart Measurements of Growing Boys, 271-280
Blood group estimation, statistical analysis of, 191

CHAPANIS, ALPHONSE, Relationships between Age, Visual Acuity and Color Vision, 1-33
Color vision, visual acuity and age, 1
Control group, graphic method of comparing with experimental group, 65
COOK, ELLSWORTH B., and WHERRY, ROBERT J., The Urinary 17-Ketosteroid Output of Naval Submarine Enlisted Candidates during Two Stressful Situations, 104-124
Correlation models, and semantics, 75

Day of week and frequency of births, 218
Definition of group to be followed, in follow-up studies, 233
DENSEN, PAUL M., Long-time Follow-up in Morbidity Studies: The Definition of the Group to be Followed, 233-237
Dermatoglyphics, and race, 34
Digital patterns, and race, 34
DORN, HAROLD F., Methods of Analysis for Follow-up Studies, 238-248

Factor analysis of ketosteroid output, 104
Fertility by ages of couples, 281
Fifty per cent end-point, sampling variation of, 151
Follow-up studies, definition of group, 233
methods of analysis, 238
theory, 249
Formosa, population growth, 293

Gene frequency analysis applied to twin data, 136
*Generalization of the Behrens-Fisher problem, on a, 125
*Graphic method for comparing percentages and means of control and experimental groups, a, 65

Growth, and temperature, 71
of boys, and heart measurements, 271
sexual, of Negro and white boys, 146
GRUBER, JACOB W., The Science of St. George Mivart, 222-232

Handedness among twins and immediate relatives, 136
HARRIS, DALE B., A Note on the Relationship of Births to Day of Week, 218-221
HARRIS, T. E., MEIER, PAUL, and TUKEY, JOHN W., Timing of the Distribution of Events between Observations: A Contribution to the Theory of Follow-up Studies, 249-270
Heart measurements of growing boys, 271
Height-weight trends, and temperature, 71
HOGBEN, LANCELOT, and KEMP, KENNETH W., Statistical Models Bearing on the Semantics of Correlation. III. Expectation-Accomplishment Models, 75-103.

Kemp, Kenneth W., *see* HOGBEN, LANCELOT
Ketosteroid output, and stress, 104

LD 50, sampling variation of, 151
Logistic curve, describing population growth of Formosa, 293
*Long-time follow-up in morbidity studies: the definition of the group to be followed, 233
Losses, in follow-up studies, 238, 249

*Marriage fertility by ages of couples, 281
Maximum likelihood estimates in follow-up studies, 249
of blood group frequencies, 191
Means, graphic method for comparing, 65
Measurements, heart, of growing boys, 271
Meier, Paul, *see* HARRIS, T. E.
Menarcheal age, trends, and temperature, 71
*Methods of analysis for follow-up studies, 238
MILLS, CLARENCE A., Temperature Influence over Human Growth and Development, 71-74
Mivart, St. George, 222
MONAHAN, THOMAS P., Marriage Fertility by Ages of Couples, 281-292
Morbidity studies, follow-up, 233, 238, 249

Percentages, graphic method for comparing, 65
*Phylogeny of digital patterns in man and its bearing on racial affinities: a study in human ecology, 34
PIZZI, MARIO, Sampling Variation of the Fifty Per Cent End-point, Determined by the Reed-Muench (Behrens) Method, 151-190.
*Population growth of Formosa, the, 293
Probability ellipses, approximate construction for, 191
Probit method of determining sampling variation of LD 50, 151
Psychological stress, and ketosteroid output, 104

QUO, SUNG-KEN, The Population Growth of Formosa, 293-301

Race, and digital patterns, 34
RAMSEY, GLENN V., Sexual Growth of Negro and White Boys, 146-149.
Reed-Muench method of determining sampling variation of LD 50, 151
*Relationship(s) between age, visual acuity and color vision, 1
* of births to day of week, a note on the, 218
RIFE, DAVID C., An Application of Gene Frequency Analysis to the Interpretation of Data from Twins, 136-145

Sampling variation in bioassay, 151
* of the fifty per cent end-point, determined by the Reed-Muench (Behrens) method, 151
SCHREK, ROBERT, A Graphic Method for Comparing Percentages and Means of Control and Experimental Groups, 65-70
*Science of St. George Mivart, the, 222
Sexual growth of boys, Negro and white, 146
*Statistical analysis of the A-B-O blood groups, 191
models bearing on the semantics of correlation. III. Expectation-accomplishment models, 75
STEVENS, W. L., Statistical Analysis of the A-B-O Blood Groups, 191-217
Stress and ketosteroid output, 104

Taylor, Griffith, Zones and Strata Theory of, 34
*Temperature influence over human growth and development, 71
*Timing of the distribution of events between observations: a contribution to the theory of follow-up studies, 249
Tukey, John W., *see* HARRIS, T. E.
Twin data, gene frequency analysis of, 136

*Urinary 17-ketosteroid output of naval submarine enlisted candidates during two stressful situations, the, 104

Variance, analysis of, 75
partition of, 75
Visual acuity, age, and color vision, 1

WALSH, JOHN E., On a Generalization of the Behrens-Fisher Problem, 125-135
Weight of boys, and heart size, 271
-height trends and temperature, 71
Wherry, Robert J., *see* COOK, ELLSWORTH B.
Withdrawal rates, in follow-up studies, 238
WOLFE, ROY I., The Phylogeny of Digital Patterns in Man and Its Bearing on Racial Affinities: A Study in Human Ecology, 34-64

Young, M. S., *see* BLISS, C. I.

Zones and Strata Theory of Griffith Taylor, 34
